

eCARGO BIKES FOR FAMILIES IN 2025

FULLY CHARGED

#SCHOOLRUNMOREFUN

*"The **Tern GSD** makes travel with children **fun** and the city **more accessible**.*

*The GSD is solid and makes it **easy to manoeuvre a heavy load** even for someone who is smaller. I love that it has near to the same dimensions as a normal bike so it fits in most of the same places."*

"I also like knowing that when my bike needs servicing I can trust Fully Charged to know all the specifics of the Tern and keep me on the road."

Myles & Ann - riding Tern
Electric Cargo Bikes

WHAT IS AN ELECTRIC CARGO BIKE?

Electric Cargo Bikes offer a highly versatile and efficient method of transport for parents that want to transport their kids and miscellaneous items.

- **Electric assisted motor**, generating up to 400% pedal assistance for those steep hills
- **Powered by a battery**, which can gain you and your cargo up to 90 miles of range in one charge
- Either a **long-tail rear rack** capable of carrying two children, or a **front-carrier** which can take up to three children
- **Up to 275kg** of gross vehicle weight, perfect for nursery or school pickups and runs to the shops

BENEFITS OF ECARGO BIKES

01

Stay Safe

We stock only the highest standard of eCargo bikes, rigorously tested and fit with premium accessories to ensure optimum safety for you and your children.

02

Reduce Running Costs

eCargo bikes are an excellent way to save thousands of pounds every year on transportation costs.

03

Better for the Planet

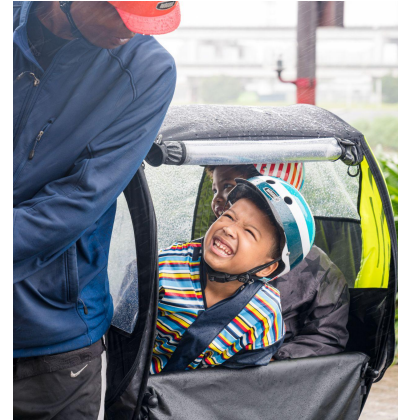

eCargo bikes are 90% less polluting than a diesel SUV and $\frac{1}{3}$ less than an electric SUV, meaning you can massively reduce emissions on the school run.

04

Save Precious Time

With the potential to halve your time waiting in traffic, an eCargo bike gives you more time in the day and the kids more quality family time back at home.

BEST FAMILY CARGO BIKES 2025

Watch now!

WHAT REAL PARENTS SAY

"This bike has **opened up possibility and made decision making easier**, making using the car less a lot more achievable; shopping, school runs, skate parks, suddenly all of these things feel possible without much thought process and whilst using Eco mode, the **fitness element is definitely not lost!**"

"I've gone from a sceptic to a convert in a very short space of time."

— **Hannah Stocks**
rides a Benno Boost

We have **two children and a dog**, so we considered many front loaders, but chose the Riese & Müller Carrie for its ease and nimbleness. We absolutely love it, and so do the kids—and Molly the dog never gets left behind! It's **transformed our life in London, making travel quick, fun, and easy.**

It's also **light and compact**, fitting easily in our house and manageable up steps or when we're away. Highly recommend it!

— **Alice Sharma**
rides a Riese & Müller Carrie

WHAT REAL PARENTS SAY

"If it wasn't for the Benno Boost-E, my daughter couldn't do ballet lessons. Ballet is on the other side of town, and she finishes school at 3:30 but her lessons start at 4pm. The traffic in Bristol is so bad that it usually takes an hour, and it takes **27 minutes on the cycle lanes** on our Benno!"

— David Cambell
rides a Benno Boost-E

"We are using the car far less. We've got an old Golf and before purchasing our cargo bike our yearly service and MOT was around the £700 mark. But since buying the bike it's significantly dropped to £300 all in... that's without even thinking about fuel! We were typically filling up once a week, and now that's gone down to once a month. It's **significantly helped us save.**"

— Chris Brown
rides a Riese & Müller Load 60

"Life in London without a car and with a cargo bike for us has been a no brainer. It's not just about getting from A to B faster and essentially having more time, but it's good to know **we're doing just a touch to help out the planet.** The kids love it, and we're now getting a bit of a community of cargo bikes so group outings are great fun."

— Nick Hill
rides a Tern GSD S10 LR

"Arthur finishes school at 3:20, and Swimming Nature classes start at 3:45 which is a mad-rush. I plonk him on the bike and within 20 minutes he is there! **I can even take the bike inside the building.** We [also] don't have the issue of parking the car up in town to get stuff from the local shops, this is a major benefit."

— Audrey Cadostin
rides a Tern GSD

WHICH eCARGO BIKE IS BEST **FOR MY FAMILY?**

**Fully Charged stock a
selection of the worlds'
best electric cargo bikes**

Here we guide you through
the pick of the bunch...

FRONT LOADING CARGO BIKES

EBIKE SECURITY

How to protect your cargo bike.

Protecting your eBike is simpler than ever with the right combination of Diamond Rated Locks, GPS Trackers, and eBike Insurance. These essentials provide peace of mind and safeguard your investment against theft.

For years, the angle grinder has been the bane of bike security, but Hiplok has changed the game. Their DX-1000 lock, combining 20mm of graphene and hardened steel, is the first true anti-angle grinder solution, earning the prestigious Diamond Security Rating from Sold Secure. With cutting-edge technology like this, you can ride worry-free, knowing your eBike is safe.

TOP MAINTENANCE TIPS FOR YOUR eCARGO BIKE

Harry Taunton
Head Mechanic at
Fully Charged

1. **Buy a track-pump and pump your tyres up!**
Check your tyre pressure every couple of months and inflate when necessary. Maintaining tyre pressure will ensure optimum comfort and performance.
2. **Clean your chain regularly**
If you have a derailleur then you can use dry lubricant or wet lubricant. If you use a dry lubricant then it's recommended for you to clean it once every 8-10 weeks, if wet lube, then once every 3 months
3. **Make sure your disc brakes are clean**
Again, a simple tip but keeping your brake discs clean will help avoid contamination of the pads and the rotor.

4. **Make sure your brake pads are not too worn out**

Depending on your usage and gross weight of your eBike, it's recommended to change your brake pads every three months.

5. **Carry a spare 'tool-kit pack'**

This usually consists of a spare inner tube and tyre levers, just in case you get a puncture, which is highly unlikely with cargo bike tyres.

6. **You have to service your bike more often than a normal bike**

A common misconception is that you don't need to service these bikes as much as normal analogue bikes, but owing to the additional weight, you do need to try and service these bikes at least once every 8 months.
