# WHY NOT TO BUY RIESE & MÜLLER

# FULLY CHARGED REVIEWS

LOUIS B | ROADSTER4 VARIO

## “ABSOLUTELY UNREAL”

Loving my Riese & Müller Roadster4 Vario. I can’t believe how light it is for an e-bike. It doesn’t feel like one in the best possible way — smooth, responsive, and genuinely fun to ride. It’s solid and planted without ever feeling bulky or heavy. The belt drive is a dream — low maintenance, super quiet, and gear changes are effortless. The build quality is top notch. Everything feels really well thought out and premium. It’s quick off the mark and handles city riding with ease. It feels light enough to weave through traffic, while still feeling sturdy and reliable. Battery life is easily more than enough for my day-to-day in London, and even if it did run out, it’s light enough to ride without assistance. Absolutely loving finally having an e-bike in London. Couldn’t recommend this one enough!

LOTTIE B | TINKER2 VARIO

## “THE BEST DECISION I HAVE EVER MADE!”

Every journey on this bike is more comfortable, efficient, smooth and enjoyable than I could have ever imagined. I was nervous purchasing an expensive eBike, it was a big leap, but I could not be happier. I used to get to work lime bikes (that's if I could find one that worked!!) or on public transport, and now I bike an hour to work everyday on the Tinker and it's genuinely changed my life! I would recommend to anyone and everyone.
