

FIVE WAYS IOT POWERED AUTOMATION BENEFITS WAREHOUSES

ENERGY EFFICIENCY

Energy management through centralized monitoring & intelligent controls enables warehouse owners to save at least 10%-20% of energy costs.

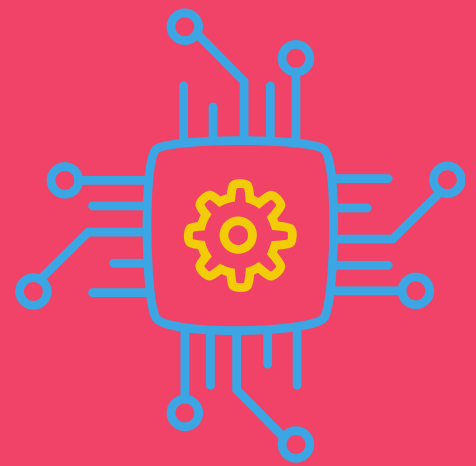

TEMPERATURE & HUMIDITY COMPLIANCE

Cold chain warehouses need to maintain the right temperature for specific perishable goods such as food, medicines, drugs. Any variation in temperature could ruin such items.

PREDICTIVE MAINTENANCE

Using AI/ML based Fault Detection & Diagnosis for predictive maintenance, warehouse managers get an alert for any anomaly in the system that could cause downtime in future.

DIGITAL TICKETING WORKFLOWS

IoT helps in generating digital ticketing workflows with real-time notifications to manage and fix any urgent fault anywhere in the warehouse.

CENTRALIZED ASSET MANAGEMENT

Assets connected to IoT are easy to manage and the user can easily access all the information for any asset on a single dashboard.
